SUMMARY

As a software engineer, I am a skilled professional dedicated to designing, developing, and maintaining cutting-edge software systems and applications. With expertise in multiple programming languages, frameworks, and tools, I excel at creating innovative solutions to complex problems. My analytical mindset allows me to thoroughly analyze user requirements, design efficient software architectures, and write high-quality code. I am committed to conducting rigorous testing to ensure the reliability and performance of software products. Collaborating seamlessly with cross-functional teams, I follow industry best practices and stay updated with emerging technologies. I bring a strong problem-solving ability and meticulous attention to detail, enabling me to drive technological advancements and enhance user experiences. My passion for software engineering fuels my continuous pursuit of excellence, making me a valuable asset to any organization.

SKILLS

Javascript, HTML, CSS, React.js, Express, Node.js, Next.js, Handlebars, jQuery, Tailwind, Bootstrap, SQL, NoSQL, MySQL, MongoDB, GraphQL, AWS, Heroku, Vercel, Apollo, Insomnia, Git control, ORM, C++, Java, Python, Linux, SwiftUI, Metro, Android Studios, Figma

EXPERIENCE

Software Engineer Intern

Woojoo Universe

December 2023 - Present, Irving, TX

Contributed to developing engaging cross-platform mobile applications using React.js, React Native, and Java, focusing on Android Studio for native Android app development. Implemented GraphQL for efficient data querying and managed SQL databases; implemented and used Insomnia for API testing. Streamlined build processes using Gradle, Webpack, and Metro, demonstrating adaptability in a fast-paced, full-stack development environment.

Jr. Fullstack Programmer

Freelancer - Upwork/Fiverr

August 2022 - December 2023, Irving, TX

Proficient in front-end technologies such as JavaScript (ES6+), CSS3, and HTML5, with a strong foundation in popular frameworks/libraries like React, jQuery, and Bootstrap. Experienced in back-end development using technologies like Node.js, Express, and databases, including SQL (MySQL) and NoSQL (MongoDB), with knowledge of GraphQL for efficient data querying. Familiar with version control using Git and adept at API testing with tools like Insomnia.

Sales Associate

Target

February 2023 - July 2023, Irving, TX

As a sales associate at Target, I primarily focused on providing exceptional customer service and ensuring a positive shopping experience. I assist customers in finding products addressing inquiries, and process sales transactions with efficiency. Additionally, I contribute to maintaining a clean and organized store environment while adhering to company policies and procedures.

Sales Associate

Wal-Mart

June 2022 - August 2022, Austin, TX

As a sales associate at Walmart, my primary focus is delivering exceptional customer service by assisting customers in finding products and answering their questions. I performed transactions accurately and contributed to maintaining a clean and organized sales floor. Collaboration with my team members and adherence to company policies are crucial. My role is to ensure a positive shopping experience for customers at Walmart. Greeting and assisting customers in a friendly and professional manner.

PROJECTS

StudyBuddy

[Website](#) | [Github](#)

- This full-stack web app allows users to create and share flashcards. It was created for people to come and share study notes. It utilized MongoDB with GraphQL and Apollo to handle the database. The webpage is built using React and styled with animate.css and typewriter-effect. It also utilizes JSON web tokens and bcrypt to manage user logins. This application was deployed using Heroku.

J.A.T.E Text Editor

[Website](#) | [Github](#)

- This is a web-based text editor application with various features. It allows you to edit and save text content using IndexedDB, bundle JavaScript files with Webpack, and utilize a service worker for offline capabilities. The application is also deployable to Heroku.

TechBlog

[Website](#) | [Github](#)

- The CMS-Style Blog Site is a web application that empowers users to create, manage, and explore blog posts. It offers features like user registration, login/logout, and the ability to view, comment on, and manage posts, and it includes session timeout functionality for security. With a blend of front-end technologies (HTML, CSS, JavaScript) and server-side scripting, it provides a comprehensive blogging experience and is typically hosted on platforms like Heroku.
- Involved in developing the back-end API with Node.js, Express.js, and MongoDB that enables the front-end application to make secure and real-time requests with authenticated user context. Increased site visits by 50% and user engagement by 40%, resulting in a 100% user retention rate.

WikiRythem

[Website](#) | [Github](#)

- WikiRythm is a web application created to improve skills in JavaScript, APIs, HTML, and CSS. It allows users to search for artists and instantly access information about their latest releases, a short bio, and a photo sourced from Wikipedia. The project also provided valuable experience in collaborative group work. Users can simply enter an artist's name, click the search button, and access a comprehensive artist profile, including their top releases.

EDUCATION

BS, Computer Science

University of Texas at Dallas • US, TX, Dallas • 2026

AS, Computer Science

Dallas County Community College • US, TX, Dallas • 2024

Bootcamp, Fullstack Developer

University of California at Irvine • CA, Irvine • 2023

CERTIFICATIONS

Bootcamp Certificate

University of California at Irvine • 2023

Boot Camp Certificate: A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node.js, MySQL, MongoDB, Express, Handelbars, and React.js.

AWS with Python

Udemy • 2021

- Cloud Expertise: The AWS with Python certification demonstrates your proficiency in cloud computing, which is increasingly important in computer engineering roles. It signifies your ability to design, implement, and manage cloud-based solutions, a highly sought-after skill in the modern IT industry. As well as automation and scripting skills: Python is a popular programming language for automation and scripting, and having this certification showcases your capability to create efficient, automated workflows, which can be invaluable for optimizing and streamlining various aspects of computer engineering, from infrastructure management to application deployment.
